

IT ASSET MANAGEMENT, DATA PROTECTION AND THEFT RECOVERY

Manage

Monitor and manage all your handheld devices within the Absolute Customer Centre (regardless if a device is on or off your LAN).

Protect

In the event of loss or theft, remotely delete all sensitive information and generate reports to prove your compliance with government and corporate regulations.

As technology evolves, mobile phones have become handheld computing devices. Instead of simply dialing numbers and recording voicemails, capabilities have exploded so that the average mobile phone can now be used to send and receive emails, open and view attachments, take photos, and access the Internet.

So if the mobile phones in your organisation are acting like computers, shouldn't you manage them like computers? Compliance with government and corporate regulations is absolutely essential for all of the IT assets in your deployment – including handheld devices.

Now you can keep track of your handheld devices and protect the data on them with Computrace® Mobile by Absolute® Software.

How it Works

Easily install our Computrace® Agent onto the handheld devices within your organisation. The Computrace Agent allows your devices to maintain a connection with our Monitoring Centre.

Once the Agent is activated – your handheld devices (and everything on them) will be protected.

IT Asset Management

With Computrace Mobile, you can immediately identify any handheld devices that have gone missing, enforce software policies, and maintain a fleet of optimally running devices.

To help you do this, we collect data from your handheld devices and provide you with access to a series of reports with information that includes:

- Hardware type
- Configuration
- Installed software
- User information

Location information requires a GPS receiver. For a complete list of supported GPS receivers, visit www.absolute.com/geolocation.

Data & Device Security

Delete data on missing handheld devices and produce an audit log of the deleted files to prove your compliance with government and corporate regulations. Set alerts so you will be notified if non-compliance activities occur.

Track

If a handheld device goes missing, the next time it calls in, you can track it within the Absolute Customer Centre using GPS technology. You will be able to see current and historical locations on a map to within about 10 metres.

"I depend on my BlackBerry[®] to run 5 different organisations, \$100 million in annual budgets, and 800 emails a day. The Computrace Agent enables me to track my BlackBerry via its internal GPS. Also, it enables my staff to track my location to an accuracy of about 20 meters. Over my 60 days of testing, it accurately tracked geolocation 24x7."
